

## **2025 Annual Sanitary Sewer Point Repair, Manhole Adjustment, Laterals Construction Contract, Package 1**

This contract will provide contractor support to supplement the SAWS Distribution and Collection Operations Group with sanitary sewer point repairs, manhole adjustments and laterals construction. This contract will allow for an improved level of service for SAWS customers by addressing repairs more efficiently, reducing response times, minimizing the amount of sanitary sewer overflows, and increasing system dependability, thus minimizing potential negative impacts to the public.

The contractor will be responsible to furnish labor, materials, equipment, and supervision to construction and repairs related to the SAWS sanitary sewer system on a work order basis as issued by Distribution & Collection management. This work might require manhole rehabilitation and replacement, cleanout installation, backwater valve installation, concrete flatwork, erosion control, topsoil placement, sodding, fence relocations, and street patching and resurfacing.

### **When Work Will Occur:**

- Construction award is planned for Dec 2024.
- Cost estimate for the project will be \$2,000,000.
- Contract term will be for 365 days or until the contract capacity runs out.

### **What to Expect:**

- The work will be throughout SAWS' sanitary sewer service area. Work orders are unspecified until time of issue.
- Repairs may be urgent in nature and require updates to customers.
- The work may include trenching and sewer cleanup during the repair.
- During the construction of this project lane closure may happen adjacent to the project site.
