11. Inspections and Assessments of SAWS Land. Within thirty (30) calendar days of the date that the notice of acceptance described in Section 6 above is delivered to the Successful Bidder (the “Inspection Period”), the Successful Bidder shall conduct, at the Successful Bidder’s sole cost, any inspections and environmental assessments on the SAWS Land that the Successful Bidder may elect, subject to the indemnity and other provisions of Section 4 of this Agreement, and shall secure any financing needed to purchase the SAWS Land. The Successful Bidder’s failure to conduct inspections and environmental assessments and secure financing shall not excuse the Successful Bidder from any obligations under this Agreement. However, in the event that the Successful Bidder obtains a Phase I environmental site assessment of the SAWS Land (“Successful Bidder’s Phase I”) from an Environmental Professional (as defined in 40 CFR Part

312.10(b)) on or before the expiration of the Inspection Period that (i) materially and adversely differs from the results of the environmental site assessment or report included as part of the Property Information Documents (hereinafter defined in Section 20) or (ii) if the Property Information Documents did not include a environmental site assessment or report, recommends a Phase II environmental site assessment or other invasive environmental site assessment be performed on the SAWS Land, then in the case of either of (i) or (ii) hereinabove, if a copy of the Successful Bidder's Phase I is delivered to SAWS within the Inspection Period, the Successful Bidder may terminate this Agreement by delivering written notice to SAWS within the Inspection Period and receive back the Bid Deposit. If an Environmental Professional (as defined in 40 CFR Part 312.10(b)) desires to communicate with SAWS, the communication must be in writing and delivered to SAWS at the address stated in Section 20, below. The Successful Bidder may not conduct a Phase II environmental site assessment on the SAWS Land, or other invasive tests, including boring and drilling, upon the SAWS Land, without SAWS' prior written consent, a condition of which shall be SAWS approval, in SAWS reasonable discretion, of Successful Bidder's plan for conducting such Phase II environmental site assessment or other invasive tests on the SAWS Land.

12. Closing Documents from SAWS. SAWS will convey the SAWS Land to the Successful Bidder by Deed Without Warranty (the "Deed") in the form attached hereto as Exhibit "C". The Deed shall be countersigned by the Successful Bidder to evidence acceptance of the terms contained therein. The Deed contains an easement reservation in favor of CPS Energy (the "Reserved Easement") and a water rights reservation in favor of SAWS. SAWS and the Successful Bidder agree to execute any other closing documents that may be reasonably required by the Title Company.

13. Closing. Subject to Section 13a below, the closing date ("Closing") will be on the first business day occurring ten (10) calendar days after expiration of the Inspection Period for conducting any inspections and environmental assessments on the SAWS Land described in Section 11 above, or on such earlier date as SAWS and Successful Bidder shall mutually agree. The Closing will be at the office of the following title company ("Title Company"):

Alamo Title Company  
4 Dominion Drive, Bldg 4; Suite 100  
San Antonio, Texas 78257  
210-698-0924

At Closing, the Successful Bidder shall pay the Bid Price (as defined in Section 23), as reduced by the Bid Deposit previously paid to SAWS, in cash or immediate good funds equivalent.

- a. This Purchase Agreement may be subject to the approval of the Board of Trustees of the San Antonio Water System. In the event that this Purchase Agreement is subject to approval by the Board of Trustees of the San Antonio Water System, SAWS shall notify Successful Bidder of same along with the Notice of Acceptance, and the Closing date shall automatically be extended to the first business day occurring ninety (90) days after the expiration of the Inspection Period, provided, however, Closing may occur earlier if approval of the Board of Trustee is obtained and if SAWS and Successful Bidder shall mutually agree on such earlier date. If this Purchase Agreement is subject to approval by the Board of Trustees of the San Antonio Water System and such approval is not obtained on or before Closing (as

extended herein), notwithstanding any provision herein to the contrary, this Purchase Agreement shall automatically terminate and the bid Deposit, if any, shall be returned to Successful Bidder, and neither party shall have any further rights or duties hereunder, except those that expressly survive termination.

14. Title Policy. Without extending the date for Closing, Successful Bidder may obtain, at its expense, a standard TLTA owner's policy for title insurance for the SAWS Land, in a policy amount equal the Bid Price, subject to all standard exceptions to title, to be issued by Title Company within a reasonable period of time following Closing. Successful Bidder is responsible for all costs for the title policy and any additional endorsements or modifications to such title policy.

15. Proration. The SAWS Land is currently exempt from real property taxes. Taxes for the year of Closing and future years will be the obligation of the Successful Bidder. If this transfer or the Successful Bidder's use of the SAWS Land after Closing results in the assessment of additional taxes, penalties or interest, including without limitation "rollback taxes" (the "Assessments") for periods prior to Closing, the Assessments will be the obligation of the Successful Bidder. Obligations imposed by this Section 15 shall survive Closing.

16. Broker's Commissions. If and only if the sale from SAWS to Successful Bidder closes pursuant to this Agreement, SAWS will pay at Closing a four percent (4.0%) brokerage fee or commission on the cash amount of the Bid Price (the "Commission") to the real estate agent representing the Successful Bidder for the SAWS Land. As a condition to SAWS' obligation to pay the Commission, Successful Bidder must identify Bidder's Broker in Section 23 below and attach to this Agreement upon submittal of the bid a copy of a written brokerage agreement by and between Bidder's Broker and Successful Bidder indicating Bidder's Broker's exclusive representation of Successful Bidder. The Successful Bidder represents and warrants that no broker other than Bidder's Broker as identified in Section 23 represents Successful Bidder and Successful Bidder hereby agrees to defend, indemnify and hold harmless SAWS and COSA for any claims for a brokerage fee or commission, other than the Commission under the terms and conditions set forth hereinabove, resulting from this transaction. The Successful Bidder's obligation to indemnify under this Section 16 shall survive Closing.

17. Closing Costs. Any escrow fee charged by Title Company shall be paid equally by SAWS and the Successful Bidder. Each party will be responsible for paying its own attorney's fees and the cost of recording any documents delivered to it or them at Closing. All other closing costs are as set forth in this Purchase Agreement.

18. Intentionally Deleted

19. Default. If for any reason the Successful Bidder fails to comply with any of the provisions of this Purchase Agreement, or if any of the representations or warranties of the Successful Bidder contained in this Purchase Agreement are incorrect or become incorrect or untrue, SAWS, at its election, may (i) terminate this Purchase Agreement and retain the Bid Deposit, (ii) waive any unmet requirements and proceed to Closing, (iii) enforce specific performance of this Purchase Agreement, or (iv) pursue any remedies it may have at law or in equity. If SAWS fails to comply with this Purchase Agreement, the Successful Bidder's sole and exclusive remedy under this Purchase Agreement shall be to terminate this Agreement, and so

long as the Successful Bidder is not also in default, the Bid Deposit shall be returned by SAWS to the Successful Bidder.

20. Property Information. SAWS has obtained information on the SAWS Land, set forth in more detail in Exhibit "D" attached hereto (the "Property Information Documents"), which will be made available to all prospective Bidders at [WWW.SAWS.ORG](http://WWW.SAWS.ORG). SAWS does not make any representation or warranty as to the quality, accuracy or completeness of any data or information contained in the Property Information Documents, and advises the Successful Bidder to independently verify any such data or information. If the Property Information Documents include a Phase I environmental assessment, SAWS does not warrant whether it will qualify Successful Bidder as an "innocent purchaser" under CERCLA, 42 USC 9601 et seq. and the Texas Solid Waste Disposal Act, Texas Health and Safety Code Chapter 361 et seq., and SAWS recommends that the Successful Bidder conduct its own environmental assessment of the SAWS Land. Further, SAWS does not represent or warrant that the Property Information Documents constitute all of the documents in SAWS possession related to the SAWS Land.

21. Notices. Any notices to be given hereunder by or to the Successful Bidder shall be given by transmitting by fax machine to the number shown below, placing the notice in the United States mail, certified or registered, properly stamped and addressed to the address shown below or such other addresses as the respective party may direct in writing to the other, or by personal or overnight delivery to such address, and such notice shall be deemed delivered upon such fax transmission with proof of transmission, placing in the mail, or upon such personal or overnight delivery:

### **SCOPE OF WORK**

As outlined, the purpose of this appraisal is to estimate the market value of the fee simple interest of the subject whole property. We were provided ownership information. Using this information as well as additional information secured from the Bexar County Deed Records and the Bexar County Appraisal District, the size of the property and the legal description were established. All information provided is assumed to be correct and has been considered in the following valuation analysis.

In analyzing the area economy, data from the various sources including the Chamber of Commerce was obtained. In addition, we inspected the subject property and surrounding properties, analyzed the area and subject neighborhood, formulated an opinion regarding the highest and best use, made a search for comparable sales and listings, and all other available pertinent information used in developing an opinion of value. This data is based upon research into the Bexar County market. In all cases, the data is verified with buyer, seller, landlord, tenant, agent, and/or broker, and cross-checked through public records.

The subject property is vacant land.

In the valuation analysis of the subject property, the Cost, Sales Comparison and Income Capitalization Approaches to value were considered. However, because the subject properties are vacant land only, the Sales Comparison Approach is the only approach that has been developed herein.

This is an Appraisal in a Summary Report format which is intended to comply with the reporting requirements set forth under Standards Rule 2-2(b) of the Uniform Standards of Professional Appraisal Practice for a Summary Appraisal Report. As such, it presents only summary discussions of the data, reasoning and analyses that were used in the appraisal process to develop the appraiser's opinion of value. Supporting documentation concerning the data, reasoning and analyses is retained in the appraiser's file. The depth of discussion contained in this report is specific to the needs of the client and for the intended use stated herein. The appraiser is not responsible for unauthorized use of this report.

## ***ANALYSIS OF DATA***

---

---

## **HIGHEST & BEST USE ANALYSIS**

---

Highest and Best Use can be defined as: "The reasonably probable and legal use of vacant land or an improved property, which is physically possible, appropriately supported, financially feasible, and that results in the highest value."<sup>3</sup>

The highest and best use involves consideration of land use as though vacant, and as improved. The potential uses of the subject are affected by the real estate economic forces of the area and neighborhood. The available uses are restricted by four criteria including physically possible, legally permissible, financially feasible and maximally productive.

### **Highest and Best Use, As If Vacant**

#### **Physically Possible**

The first constraint is dictated by the physical attributes of the property itself. The subject property is located on the NL of Morey Peak, between Mount Tipton and Mount Ida (1214 and 1302 Morey Peak), San Antonio, Texas. 1214 Morey Peak contains 0.3162 acres and 1302 Morey Peak contains 0.3250 acres. The sites are basically level to slightly sloping and are basically rectangular in shape. According to available maps, ±0% of the sites are located within the floodplain. The subject properties currently have all utilities available. Therefore, based on the physical characteristics of the site, there are no significant detriments to the sites.

#### **Legally Permissible**

Legal restrictions, as they apply to the subject are private restrictions such as easements, and public restrictions such as zoning. There are no known deed restrictions which would significantly limit the development alternatives of the property. As previously mentioned, there are no known adverse easements. In consideration of zoning, the subject properties are zoned R-5; Residential Single Family District.

Also considered within the context of Legally Permissible is conformity with surrounding properties. "Conformity is the appraisal principle that holds that real property value is created and sustained when the characteristics of a property conform to the demands of the market."<sup>4</sup> The principle of conformity can also greatly influence the determination of highest and best use. This principle states that the best use of the site is made when the use is reasonably similar to surrounding land uses so that there is no abrupt or inappropriate change from one category to another.

As discussed in the *Neighborhood Description* section, both commercial and residential development is located throughout the neighborhood. The subject properties are vacant land. They are surrounded by vacant land and residential uses and are located within a residential subdivision.

In summary, the legally permissible component of the highest and best use analysis is considered to point toward residential development due to zoning, future land use, compatibility and surrounding uses.

<sup>4</sup> *The Appraisal of Real Estate, 13<sup>th</sup> Edition*, (Chicago: Appraisal Institute, 2008), p.41.

## ***HIGHEST & BEST USE ANALYSIS***

---

### **Financially Feasible and Maximally Productive**

This section requires that the forces of supply and demand be in balance, and that the property developed will provide sufficient income to return profit to the land. In this instance, a residential development is considered to be the most reasonable use of the site and will generate the highest return to the land.

### **Highest and Best Use Conclusion, As If Vacant**

Considering all of the factors which influence highest and best use, it is our opinion that the subject sites, if vacant, would most likely be put to residential development in accordance with market demand.

### **Highest and Best Use Conclusion, As If Improved**

The subject properties are vacant land.

## ***APPRAISAL PROCESS***

---

In estimating the value of real property, there are three recognized approaches or techniques that, when applicable, can be used to process the data considered significant to each into separate value indications. In all instances the experience of the appraisers, coupled with objective judgment, plays a major role in arriving at the conclusions of indicated value from which the final estimate of value is made.

The three approaches are commonly known as:

**The Cost Approach** - An estimate of the present reproduction cost of the improvements, less accrued depreciation, plus land value. Depreciation includes all loss in value of the improvements due to physical deterioration, functional obsolescence, and economic obsolescence.

**The Sales Comparison Approach** - Comparison with similar properties that have sold in the market. This Approach can be applied to land alone or to improved properties.

**Income Capitalization Approach** - Capitalization of the net income that the property can produce. This Approach is applicable only to income producing properties.

In the valuation analysis of the subject property, the Cost, Sales Comparison and Income Capitalization Approaches to value were considered. However, because the subject properties are vacant land, the Sales Comparison Approach is the only approach that has been developed herein.

---

## ***THE SALES COMPARISON APPROACH***

---

## ***THE SALES COMPARISON APPROACH***

---

The Sales Comparison Approach will be utilized to estimate the fee simple value of the subject site. This approach is considered the most valid indicator in estimating the market value of unimproved land not typically leased in the marketplace. In valuing property via this approach, as many land sales as possible are gathered and the most comparable are used for comparison. Since properties are seldom identical, the comparable sales must be adjusted to the subject for differences in time, location, and physical characteristics to indicate a value for the subject tract.

When valuing real estate via the Sales Comparison Approach, the subject and comparables must be broken down into units of comparison. Units of comparison for vacant land include price per front foot, price per lot, price per acre (buildable or total), price per square foot (buildable or total) and price per buildable unit. The method of comparison is based on the method typically used to purchase vacant tracts in a given area. The price per Lot appears prevalent in the area and will be the unit of comparison in our valuation of the subject site.

In undertaking our research efforts, we made a diligent search of the subject's neighborhood for properties that had sold or that were under contract. Our research included searching for vacant land tracts that exhibited similar characteristics. Included on the following page is a summary of the documented land sales that have been used in estimating the value of the subject. A location map has also been included.

## **THE SALES COMPARISON APPROACH**

---

### **THE ADJUSTMENT PROCESS**

In order to narrow the range of sale prices indicated by the comparable sales, adjustments will be made to the sales for differing characteristics. The adjustments will be applied based on the number of rating categories of difference between the comparable sale and the subject. For example, a slightly inferior rated sale differs from the subject by one rating category, while an inferior rated sale differs from the subject by two rating categories. The adjustment process will begin with a discussion of the property rights.

**Property Rights Conveyed** - The transaction price of a sale is always based on the real property interest conveyed. In this instance, an adjustment for this attribute is not considered necessary.

**Terms of Sale/Financing** - The sales price of a property may differ from that of an identical property due to different financing terms. An adjustment for cash equivalency is not warranted.

**Conditions of Sale** - This category reflects the motivations of the buyer and seller. In many instances, the conditions surrounding a sale can greatly impact the final sales price. No adjustments for conditions of sale appear to be warranted.

**Market Conditions/Time** - The sale comparables utilized in the present analysis ranged in date of sale from 03/24/11 to 09/28/12. Considering the general market conditions, no adjustment for market conditions is considered warranted.

**Location** - The following Table summarizes the location ratings:

LOCATION RATINGS		
Sale	Location	Rating
1	NEL Larkspur, between Baltic Dr. and Amhurst Dr. (1711 Larkspur), San Antonio, Bexar County	Similar/0.0
2	SL of Ivy Oak Court, west of Vantage Hill Dr. (2806 Ivy Oak Court), San Antonio, Bexar County	Similar/0.0
3	Terminus of Elys Path, northwest of George Rd. (3210 Elys Path), San Antonio, Bexar County	Superior/1.0
<i>Subject</i>	NL of Morey Peak, between Mount Tipton and Mount Ida (1214 and 1302 Morey Peak), San Antonio, Texas	

Based on the general location characteristics of the properties, an adjustment for location appears necessary. Considering the general locational differences of the comparables, an adjustment of 10% per rating category has been applied. These adjustments are considered sufficient to account for the locational differences between the sales and the subject property.

#### **Physical Characteristics:**

Included in the physical characteristics adjustments are various categories including size of properties, improvements on the property, frontage, entitlements, easements, topography, utilities, flood plain, zoning, etc. The following summarizes those characteristics which require adjustment.

## **THE SALES COMPARISON APPROACH**

---

**Size:** The sizes of the whole properties are 0.3250 acres and 0.3162 acres while the sales range in size from  $\pm 0.2101$  acres to  $\pm 0.2342$  acres. Based on the variation in size of the properties, an adjustment for size appears necessary. As such, the sales have been adjusted 10% per doubling. These adjustments are considered to be sufficient to account for the size differences between the sales and the subject properties.

SIZE RATINGS		
Sale	Size	Rating/Doubling
1	$\pm 0.2342$ acres	Inferior/0.5
2	$\pm 0.2101$ acres	Inferior/0.5
3	$\pm 0.1873$ acres	Inferior/1.0
<i>Subject</i>	0.3250 acres and 0.3162 acres	-----

**Floodplain/Topography:** The subject tract is basically level to slightly sloping and  $\pm 0\%$  of the site is within the flood plain. None of the sales are located in the flood plain. As such, all of the sales are considered to be similar to the subject and no adjustment is necessary.

**Zoning:** The subject property is R-5; Residential Single Family District. All of the sales are considered to be similar to the subject and no adjustment for zoning is considered necessary.

**Utilities:** The subject property currently has all utilities available. All of the sales are considered to be similar to the subject and no adjustment for utilities is considered necessary.

**Corner:** The subject property is not located on a corner. All sales are considered to be similar to the subject for this characteristic and did not require an adjustment.

**Other Characteristics:** Sale 2 is located on a cul-de-sac street and is considered superior for this characteristic. As such, Sale 2 has been adjusted downward -5%. No additional adjustments were considered necessary. The following adjustment grids illustrate the adjustments applied to the sales.
