Clarifications to the RFQ

The following question was received in writing:

Question 1: The RFQ states that the project is estimated at approximately \$88,000.00. We [our firm] would like to confirm that number. We think that it is low in looking at the scope of the project and the project locations. Would you please confirm for us.

Answer: The estimated project cost was developed for the purpose of project planning. The project fee will be negotiated with the selected firm.
