

2022 LONG-TERM FLOW MONITORING RFQ
Solicitation Number: PS-00124

ADDENDUM 1
February 22, 2022

To Respondent of Record:

QUESTIONS

1. **QUESTION:** This project is similar to the recent water condition assessment in that a large portion of the cost is associated with equipment. The equipment vendors are not SMWBEs. Will SAWS evaluate reducing the SMWBE % for this submittal?

Response: Although the aspirational goal remains at 40%, the full range of SMWB points can be earned through 10% of SMWB participation. Refer to item #1 in the Changes to the RFQ section of this Addendum.

2. **QUESTION:** In Section I. Project Information, Item 3.C.e., it states, "The firm must provide all permits required for installation of flow meters." Does this also include MOT permitting or is this related to confined space permits? Please provide the approximate number of locations in State, County, and City roadways.

Response: The permitting requirement includes both MOT and confined space permits. The approximate quantity of locations on State and City roadways is 20 and 70 respectively. There are no current locations on county roads. This information is based on currently installed locations and is subject to change.

3. **QUESTION:** What is the average height of SAWS facility rooftops? Are they mostly single-story structures or taller?

Response: SAWS facilities requiring access are single story structures.

4. **QUESTION:** How many of the proposed sites have been previously monitored?

Response: All of the sites indicated are being monitored. This is subject to change throughout the term of the contract.

5. **QUESTION:** How many of the proposed sites are currently monitored?

Response: See response to question #4 above.
