

REQUEST FOR QUALIFICATIONS (RFQ) ADDENDUM

Dos Rios Water Recycling Center (WRC) Re-Rating Ph II – Primary Settling Tank
Improvements Project
Professional Engineering Design Services RFQ
Solicitation No: Q-12-006-MF

Addendum #2 – May 3, 2012

This Addendum includes responses to questions received prior to May 1, 2012 at 4:00 PM.

Questions and Answers

- Q1. Please clarify the meaning of this statement from Page 8, B.7: “These pages will/will not count towards the page limit of 30 pages”
- A1. These pages **will** count towards the page limit of 30 pages.
- Q2. May covers and tabs be over the 8-1/2x11 size requirement (slightly oversized to cover 8-1/2x11 pages)?
- A2. Yes.
- Q3. Will covers and tabs (for purpose of organizing the proposal contents) be counted toward the page count?
- A3. No.
- Q4. Please verify that 11x17 pages will count as one page in the proposal and that those pages may be landscape and tri-folded.
- A4. 11x17 pages will count as one page in the proposal. Those pages should be folded down to 8-1/2x11. **There shall be no more than three (3) 11x17 pages out of the 30 page limit.**
- Q5. Are there any special permitting requirements for the proposed project?
- A5. A notification letter to TCEQ will be required. Since the overall plant capacity will not increase as a result of this project, a permit amendment is not required.

Additionally, because this project entails the construction of electrical buildings that will be habitable, a City of San Antonio (COSA) building permit will be required. SAWS has templates for the COSA permitting application packet that will be provided for the Consultant to edit and submit prior to the Bid Phase. Due to the addition of impervious cover from construction of the proposed facilities, the applicable storm water management forms should be included in the permitting application packet.
