

Cresta Bella Wastewater Extension

A wastewater main crossing of IH-10 near Camp Bullis Road is required to decommission the existing lift station servicing the area. This main is being upsized to a 15" wastewater main to service future development in the area per an executed Utility Service Agreement (USA).

When Will Work Occur?

- Work is anticipated to begin sometime late in 2024.
- Estimated construction duration is 150 calendar days, and the estimated construction budget is \$1.5 million.

What to Expect:

- Construction activities related to the installation of the 15" wastewater main via both open cut and bore construction methods.
- Decommissioning of the existing lift station on the west side of IH-10 just north of Camp Bullis Road.
