

**REQUEST FOR QUALIFICATIONS
LIFT STATIONS REHABILITATION – PHASE 5**

Solicitation No.: PS-00067

Addendum 2 | December 3, 2018

QUESTIONS AND ANSWERS

- Q: In the “Experience in Similar Projects” section, may we use project experience that our proposed PM has from a previous firm and/or project experience from our proposed subconsultants/teaming partners?
- A: Purpose is to demonstrate the prime consulting firm’s experience in similar projects (with the same proposed team members, as possible). The subconsultants/teaming partners’ and the PM’s current and previous experience can be presented in the Project Team, Resumes and Availability Matrix section.
- Q: Part I.A. Objective on Page 1 of 67 indicates that:
“The Project, being the last phase, will entail upgrades and renovations of approximately 18 existing lift station facilities located at Port San Antonio and Lackland Air Force Base...”

The Preliminary Engineering Report for Phase 5 Lift Station Rehabilitation dated September 2017 outlines the evaluation of 16 lift stations at Port San Antonio and Lackland AFB. Are there two more lift stations included in the project? If so, where are they located, and what is the anticipated scope of work associated with them?

- A: The Lift Station Nos. 305 and 307 were not part of the Preliminary Engineering Report dated September 2017. These have recently been added to the Project. They are located at Port San Antonio, and will be demolished.
