# I. Project Information

# A. Objective/Background

The San Antonio Water System (SAWS) is soliciting proposals from interested and qualified professional service providers (the Consultant) to provide an array of professional services to assist SAWS in furthering its water and revenue loss management program. In recent years, the calculated percentage of SAWS' nonrevenue water losses has slowly increased. Beginning in 2012, SAWS committed an employee to examine nonrevenue water efforts and data collection in order to report this topic more accurately. In 2013, the Texas Legislature passed a law requiring water utilities that receive loans from the Texas Water Development Board (TWDB) to report their nonrevenue water percentage and provide plans and goals for reducing their nonrevenue water losses as part of each utility's water conservation plan.

Expertise is needed to help refine SAWS' annual water audit, its control of apparent (revenue) losses, as well as assistance in continuing reductions in real (leakage) losses. The selected Consultant must bring innovative approaches to further refine SAWS' annual water audit and develop a plan to control these losses. The Consultant shall have demonstrated extensive and current experience in progressive water loss control methods and is expected to provide expert guidance and assistance to SAWS to continue its development of the water and revenue loss management programs. All work will be assigned to the Consultant by a designated SAWS Program Manager (PM), and all consultant work will be monitored by the PM.

SAWS operates one of the largest drinking water supply systems in the United States. For the fiscal year ending December 31, 2012, SAWS supplied 216.5 million gallons per day (mgd) through approximately 6,600 miles of water distribution piping infrastructure. However, only 181.8 mgd of water was documented as billed consumption at customer accounts, leaving nonrevenue water in the amount of 34.7 mgd. SAWS bills an active customer population of over 480,000 accounts. All water utilities suffer some measure of real (leakage) losses that inflate the system's operation and maintenance costs and cause unnecessary withdrawals from source water resources. Similarly, all water utilities suffer some level of apparent losses, which consist of customer meter inaccuracy, unauthorized consumption and systematic data errors. Apparent losses cause water utilities to miss a portion of the revenue to which they are entitled since these losses occur when water reaches a customer but is not accurately registered for billing purposes. One primary goal of this Request for Qualifications is to reduce these losses and ultimately return this lost revenue to the system.

# B. Scope of Services

SAWS desires to receive statements of qualifications (SOQ) from Consultants able to provide an array of professional services including analytical services, data collection via instruments installed in the water distribution systems, development of sophisticated spreadsheet tools, and guidance in water loss control planning. The Consultant will work with SAWS and will provide guidance and recommendations for cost-effective water loss control and recovery within the SAWS system and operations.

SAWS envisions that the Consultant will work on a variety of assignments including a set of short term and long term deliverables.

- 1. Short Term Deliverables to be completed by December 31, 2013:
  - a. Assist SAWS with creation of five-year water loss reduction goals as part of water conservation plan update in the format required by the TWDB.
  - b. Complete a review of SAWS' most recent three years of water loss audits

- c. Complete a review of SAWS' nonrevenue water practices, including a review of SAWS' direct activities to reduce water losses, and a review of SAWS operations and business practices that influence nonrevenue water. Provide an assessment and make recommendations to SAWS practices, procedures, and programs.
- d. Assess and recommend prioritized opportunities for improvement associated with five-year goals, including an estimate of investment needed.
- e. The Consultant will submit a proposal to include strategies to be incorporated into SAWS' nonrevenue water program.
- f. Other items that may be recommended in the proposal
- 2. Long Term Deliverables to be considered after December 31, 2013:
  - a. Assessment of SAWS large meter testing and replacement program
  - b. Assessment of SAWS distribution system valve program
  - c. Assessment of SAWS leak detection program
  - d. Assessment of SAWS procedures for selling/providing services to new commercial customers
  - e. Assessment of SAWS pressure zone management activities
  - f. The Consultant shall provide potential revenue and water loss gains as shown by the water use data collection analysis. This information should include potential return on investment if recommendations are implemented by SAWS.

# C. Additional Requirements

- 1. The Consultant's progress is expected to occur as a combination of work performed by the Consultant in the City of San Antonio, to examine system infrastructure or records, conduct field inspections and gather field data from the water distribution system, meet with SAWS personnel, assist startup testing of new systems and similar activities. The majority of the work, however, may be conducted off site at the Consultant's facilities, in order to analyze data, conduct evaluations, hold conference calls, and assemble reports.
- 2. Respondents considering Performance Contracting based proposals will not be accepted and will be considered nonresponsive.
- 3. The successful Consultant shall be required to
  - Furnish any required instrumentation, tools, computers, software, equipment, supplies, transportation, and other execution accessories, required to be incorporated in and form a permanent part of the completed work;
  - Provide and perform all necessary labor;
  - In accordance with good technical practice; with due diligence; and in accordance with the requirements, stipulations, provisions and conditions of this proposal request and resultant contract, execute and complete all specified work; and
  - Return all materials given as source materials to SAWS.

In the event Contractor fails to return all security badges and parking tags, in addition to any other rights or remedies to which SAWS may be entitled at law or in equity, SAWS may withhold from payment to the Contractor the sum of \$500.00 dollars per badge or parking tag as liquidated damages. Contractor agrees that the actual amount of damages for failure to return the badges and/or parking tags are difficult to determine, and the liquidated damages herein are not a penalty, but are a reasonable estimate of the costs and expenses that may be incurred by SAWS for failure to return the badges or parking tags.

SAWS facilities require a SAWS employee to physically escort Contractor at all times. SAWS may, in its sole discretion, waive the escort requirements if the PCDF and a "clean" Background Screening Letter, signed by an authorized representative of Contractor are approved by SAWS Security.

Sub-Contractors must always be under escort of the Contractor while performing work on any SAWS property. Sub-Contractors must display either a company photo badge, with name, or a valid driver's license at all times while working on any SAWS property. Contractor is solely responsible for the actions of its employees, agents, sub contractors and Contractors.

Contractor MUST be prepared for additional security requirements at its expense if violations of SAWS Security procedures are noted. Some examples of additional requirements include hiring of SAWS approved security guards, temporary fencing, mobile Closed Circuit Television Monitoring trailer(s), or extra lighting. Notwithstanding anything herein to the contrary, any provisions in these Security Procedures that may appear to give SAWS the right to direct Contractor as to details of doing any work under this Agreement or to exercise a measure of control over any security measures or such work shall be deemed to mean that Contractor shall follow the desires of SAWS in the **results** of the work or security measures only.

Advance coordination by Contractor with SAWS Security for these security requirements is necessary to ensure no delays with timely performance of the work. In the event Contractor fails to comply with SAWS Security requirements, SAWS may, with no penalty or claim against SAWS:

- Issue a Work Stoppage Order until the security violation (s) are remedied
- Ask any unidentified or improperly identified person or equipment to leave SAWS site immediately and not return until items are remedied
