BPC East/West Small Diameter Package 1 - CIPP

Rebuilding Sewer Infrastructure in Your Neighborhood

SAWS construction work on this project will rehabilitate approximately 4,846 feet of 8-inch through 18-inch sewer main located throughout the East and West Sewersheds. This project is part of the work required by San Antonio’s agreement with the EPA to rehabilitate deteriorated sewer infrastructure across the city.

When Will Work Occur?

Construction is planned for the 1st quarter of 2020. Estimated construction duration is 12 months.

Construction Elements:

✓ Location 1 is within the ROW along Nacogdoches at Camelia where 1183 LF of 8 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 2 is within the ROW and crossing Grissom where 401 LF of 8 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 3 is within the ROW along Military at Westfield where 301 LF of 8 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 4 is within the ROW along Broadway and Loop 410 where 469 LF 8 inch of pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 5 is within the ROW and crossing Nacogdoches Rd where 160 LF of 10 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 6 is within the ROW along O’Connor Rd where 376 LF of 8 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 7 is within the ROW on Southcross Blvd where 488 LF of 10 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 8 is within the ROW along Garraty Rd and crossing Harry Wurzbach where 93 LF of 18 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 9 is within the ROW on Binz-Engleman where 583 LF of 8 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 10 is within the ROW along Broadway at Gulfmart Dr where 388 LF of 8 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 11 is within the ROW along Stemmons Dr where 96 LF of 8 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method.
✓ Location 12 is within the ROW on NW 36th St in an alley north of Globe Ave where 25 LF of 8 inch pipe will be rehabilitated by cured-in-place-pipe (CIPP) trenchless method and 283 LF of 8 inch main will be replaced in place.
