Multiple Sewershed Package 7C

SAWS construction work on this project will rehabilitate and replace of approximately 478 linear feet of 24-inch through 48-inch sewer main via open cut method. Sewer mains are located in multiple location throughout San Antonio. This project is part of the work required by the Consent Decree between San Antonio Water System, the United States of America, and the State of Texas to rehabilitate sewer infrastructure across the city.

When Will Work Occur?

Construction is planned for the 1st quarter of 2020. Estimated construction duration is 10 months.

Construction Elements:

✓ Construction work on Hoefgen Avenue consists of removing 167 linear feet of 8-inch and 96 linear feet of 24-inch and realign and replace with 445 linear feet of 24-inch PVC sewer pipe utilizing open cut methods, including sanitary sewer service lateral replacement and replacement or rehabilitation of associated manholes.
✓ Construction work near Pecan Grove Boulevard consists of replacing existing 48-inch pipe via open-cut- method as well as reconstruction or rehabilitation of large sanitary siphon structures.
