**\*LOW BIDDER**

Testing was conducted on each of the polymers submitted. The test determined the pounds of polymer needed to thicken 1 ton of sludge. Polydyne's product used the least amount of polymer to thicken 1 ton of sludge and Polydyne submitted the lowest price per pound. See attached for testing results.

Historically SAWS has used 1,000,000 pounds of polymer per year. Estimate used for calculation purposes, actual amount may vary based upon yield, number of pounds polymer to thicken 1 ton of sludge.
