

2021 CMOM Package 6B (Bore)

SAWS construction work on this project will rehabilitate and replace approximate 300 feet of 12-inch sewer main by Bore Trenchless method, 54 feet of 12-inch sewer main by Open Cut Trench method and abandon 896 LF of 12-inch sewer main at two locations along IH-10 East in the city of San Antonio. This project is part of the work required under Subsection V.A., Capacity, Management, Operation, and Maintenance Program (CMOM) of the Consent Decree between the San Antonio Water System (the “System”), the United States of America, and the State of Texas that was lodged in the United States District Court for the Western District of Texas on July 23, 2013.

When Will Work Occur?

Construction is planned for Summer of 2024. Estimated construction duration is 240 calendar days.

Construction Elements:

- ✓ Rehabilitation of approximately 300 LF of 12-inch gravity sewer mains by Bore Trenchless method and replacement of 54 feet of 12-inch sewer main by Open Cut Trench method.
- ✓ Abandonment and grout of approximately 872 LF of 12-inch gravity sewer mains, the abandonment and removal of 24 LF of 12-inch gravity sewer main, and the abandonment in place of one existing manhole.
- ✓ This project will address sewer mains in need of repair based on condition assessment and will also replace associated manholes.
- ✓ Bypass of large and small diameter sanitary sewer required.
