

Highland-Goliad Water Main Replacement

SAWS construction work on this project will install approximately 17,500 feet of new 8-inch and 12-inch water mains in the neighborhood northwest of the Goliad Rd and E. Southcross Blvd Intersection. The existing 2-inch, 6-inch, and 8-inch asbestos cement (AC), cast iron (CI), and ductile iron (DI) pipe will be abandoned in the alleys and the new main will be installed in the streets. Yard piping will be installed to connect existing services to the the new water mains.

When Will Work Occur?

Construction is planned to commence in mid-2024. Estimated construction duration is 520 days.

Construction Elements:

- ✓ Existing mains will be abandoned in the alleys and the new mains will be installed in the streets.
- ✓ Water main installation will be done by open-cut construction, requiring pavement repair and traffic control.
- ✓ Moving the water main from the alleys to the street will require over 350 water meter relocates and yard piping work.
- ✓ Estimated construction cost is \$8.5 M
