

Treatment Facilities Engineering Work Order Contract

This annual contract will fund design services to evaluate, design, and bid processes and associated equipment at SAWS treatment and recycle facilities that require rehabilitation, improvement, addition, demolition, replacement, or expansion. These facilities include:

- Wastewater treatment facilities (SAWS water recycling centers)
- Recycle water pump stations (SAWS water recycling centers)
- Recycle water system (SAWS service area)
- Cooling system (SAWS system downtown)
- Lift stations (SAWS service area)
- Odor control stations

The scope of design work will include, but is not limited to: geotechnical, potholing, and subsurface utility investigations; surveying; permitting; public meetings and hearings attendance; environmental studies; preliminary engineering work for site/civil, structural, mechanical, electrical, instrumentation and control systems evaluation, recommendations, and design; preparation of construction plans, specifications, cost estimates, construction schedules; assistance in bidding; construction phase services including review of contractor submittals, responding to requests for information, preparing requests for proposals or change orders, reviewing contractor pay estimates, attending construction progress meetings and walkthroughs, conducting substantial and final completion inspections; and other related services as needed.

This engineering work order contract is necessary to provide an immediate response to the process and equipment evaluation and design needs at SAWS treatment and recycle facilities. Design work orders will be issued upon identification of the projects that require immediate responses. Services will be on an “as-needed” basis and will vary in size and location.

When Will Work Occur?

- Issuance of Request for Qualifications is targeted for the 3rd/4th Quarter of 2024.
- The design budget is \$1,500,000. Up to two contracts may be awarded for a total of \$1,500,000.
- Construction: TBD based on Work Orders to be Issued
