

Hume Road Water Main Replacement Project

SAWS construction work on this project will consist of demolition of existing structures or trees, removing, relocating, and disposing of vehicles, construction equipment, trailer house, illegally dump debris, within SAWS utility easement. It will also consist of constructing fence with gates and extending 12-inch waterline through existing in use rail road tracks and existing county roads by boring underneath and open cut remainder of unpaved surface, interconnections from the existing 12-inch water main from Hume Road and Old Pleasanton Road, installing new combination air and vacuum release assemblies, fire hydrant assemblies and other appurtenant work.

When Will Work Occur?

Construction is planned for the Fall of 2019. Estimated construction duration is 6 months.

Construction Elements:

- ✓ Disposal or relocation of construction equipment, vehicles, trailer house, illegally dump debris within SAWS utility easement.
- ✓ Construct 12-inch water main and interconnect Hume road and Old Pleasanton Road.
