

Updates to the 2014 Construction Specifications

<u>Item No.</u>	<u>Changes Made</u>
100	Updated description spec; Updated payment spec.
101	Updated payment spec.
200	Added sample requirement.
300	Updated measurement spec; Updated payment spec.
307	Updated materials spec; Clarified CoSA spec reference in finish section.
804	Updated description spec; Added submittals spec; Removed blasting from approved trenching methods; Clarified differing compaction levels for backfill and pavement; Updated sieve sizes; Give inspector authority on the location of density tests; Change probe length requirements; Updated City Preservation Officer's phone number; Updated for city code change regarding Unidentified Sites Archaeological.
812	Added submittals spec; Updated materials spec; Updated construction spec; Updated payment spec.
813	Updated construction spec.
814	Added submittals spec; Updated measurement spec; Updated payment spec.
816	Added submittals spec; Updated welded joints section; Clarified interior surface preparation section; Updated measurement spec; Updated payment spec.
818	Combined section 818 and 819; Added submittals spec; Updated construction method spec; Updated measurement spec; Updated payment spec.
819	Removed.

Updates to the 2014 Construction Specifications

<u>Item No.</u>	<u>Changes Made</u>
820	Added submittals spec; Updated measurement spec; Updated payment spec.
821	Moved section HP from Appendix to section 821; Clarified the minimum pressure requirement of 200 psi for HP zones; Added measurement spec; Added payment spec.
822	Updated installation section.
824	Updated tapping of AC pipe section.
828	Added submittals spec.
830	Added submittals spec.
831	Added submittals spec.
832	Added submittals spec.
833	Added submittals spec; Updated construction spec.
836	Added submittals spec.
839	Updated description spec; Updated material spec; Clarified language in construction spec.
840	Updated construction spec.
841	Renamed construction spec to protocol spec; Added the requirement that the inspector must be present for the duration of the testing.
845	Added description spec; Added submittals spec; Added material spec; Added measurement spec; Added payment spec.
846	Added submittals spec.
847	Clarified acceptable working conditions for SAWS personnel.
848	Updated description spec; Added submittals spec;

Updates to the 2014 Construction Specifications

<u>Item No.</u>	<u>Changes Made</u>
	Clarified when SDR 26 PVC pipe must be used for laterals; Removed CDC pipe from spec; Updated payment spec.
849	Added submittals spec; Added testing requirements; Clarified payment spec.
850	Clarified description spec; Added submittals spec; Updated referenced spec for membrane curing compound section; Updated coating section; Updated testing spec; Clarified hydrostatic testing section; Updated test procedure section.
851	Updated description spec; Added submittals spec; Clarified construction spec; Removed testing spec; Clarified payment spec.
852	Added submittals requirement; Added section for water resistant and water tight manholes, rings, and covers; Changed the minimum internal diameter of throat rings; Revised coating and testing requirements; Added new requirement for concrete cradles on new pre-cast manhole; Removed specifications regarding monolithically poured concrete manholes; Removed Table 852-1; Clarified the amount of throat rings that can be used; Updated test procedure section.
853	Updated testing spec; Added submittals spec; Updated references; Changed minimum internal diameter of throat rings; Changed backfill density requirements; Updated testing requirements; Removed Table 853-1.
854	Added submittals spec; Added concrete encasement requirement; Update payment spec.
856	Added submittals spec.
860	Clarified the description spec;

Updates to the 2014 Construction Specifications

<u>Item No.</u>	<u>Changes Made</u>
	Added submittals spec; Updated measurement spec.
862	Updated description spec; Added submittals spec.
866	Added inclinometer requirement; Clarified that no lateral connections shall be made at the 12 o'clock position.
869	Updated description spec; Added measurement spec.
900	Clarified minimize noise impact section; Corrected ASTM reference from D3550 to D3350.
902	Moved majority of this spec from the appendix to this section; Changed format of this spec to match the rest of the specs; Updated reporting to ensure new safety plan is submitted after an accident; Removed implementation spec.
903	Moved majority of this spec from the appendix to this section; Changed format of this spec to match the rest of the specs; Clarified the specific activities section; Removed implementation spec.
904	Moved majority of this spec from the appendix to this section; Changed format of this spec to match the rest of the specs; Updated submittals spec; Removed implementation spec.
906	Removed implementation spec; Clarified the payment spec.
1100	Added submittals spec; Clarified when pipe shorter than 20 feet can be used; Added Requirement that the Inspector must first validate obstruction removals and point repairs; Update post-installation video recording section.
1101	Updated payment spec.
1103	Updated jointing material section; Referenced item No. 866.
1109	Added submittals spec.
1110	Added measurement spec; Added payment spec.

Updates to the 2014 Construction Specifications

<u>Item No.</u>	<u>Changes Made</u>
1112	Updated description spec; Added measurement spec; Added payment spec.
1114	Updated description spec; Added measurement spec; Added payment spec.
3000	This is a new spec regarding the handling of Asbestos Cement Pipe.
