Specifications For Multiple-Use Ear-Plug Hearing Protection

Revised July 27, 2012

1. **SCOPE**

This specification covers reusable plug-type hearing protection, used by employees who work where noise levels are above a time-weighted average of 85 dB(A).

2. **GENERAL REQUIREMENTS**

NRR tested by ANSI S3.19-1974 or ANSI S12.6-1997

Description: Soft plastic material around a pocket of air, washable with soap and water, capable of muffling high and low frequencies.

Physical Property Data:

Attenuation: NRR, 27 dB minimum.

Plugs: 4-flange air-pocket design, tapered shape, universal size, with internal fins for dependable attenuation and a firm stem for easy insertion/removal, with poly cord

Weight: 2 oz. Maximum

Packaged: Individual poly bags.

Special Notations:

SAWS, at no cost to the manufacturer, may subject random units to testing by an independent laboratory for compliance with these specifications. Any visible defect or failure to meet the quality standards herein will be grounds for rejecting the entire order.
