

SAN ANTONIO WATER SYSTEM
SAN ANTONIO, TEXAS

Specifications For Reusable Extra Long Insulated Nitrile Gloves

Developed December 5, 2013

1. SCOPE

This specification covers personal protective glove wear to be worn by San Antonio Water System (SAWS) employees for use in situations where the arms above the elbows may be exposed to waste water, mud, grease, oil, or other chemical substances. Because of insulating properties, it may also be used during chlorine or sulfur dioxide change-out procedures or during emergency response to a chemical emergency. Glove wear shall be offered in a variety of sizes.

2. GENERAL REQUIREMENTS

Description:

- Knit liner to aid with putting on, taking off
- Offers low-temperature protection to at least -10°F
- Material: Supported Nitrile
- Rough surface for grip, elastic cuff
- Mild chemical resistance
- Color: Blue (preferred)
- Length 26"
- Sizes 8-11 (Medium to XXLarge)
