**TO:** Capital Improvements Advisory Committee

FROM: Tracey B. Lehmann, P.E., Senior Director - Development

**DATE:** July 26, 2023

**SUBJECT:** July 26, 2023 Status Update

The purpose of this memo is to provide a summary of SAWS impact fee eligible Capital Improvement Projects.

SAWS owns and operates an infrastructure-intensive system comprised of treatment facilities, pumping stations, storage facilities, and pipelines that are continuously improved and expanded. The schedule for future investment in the water and wastewater system is known as the Capital Improvements Plan (CIP). Projects included in the CIP can serve to rehabilitate and renew the system, enhance the system to improve efficiency and meet regulatory requirements, increase the system capacity, or achieve a combination of these objectives. SAWS staff prepare and maintain a draft CIP that forecasts projects to be designed and/or constructed over the next five years.

The draft five-year CIP is used to develop current year CIP which is funded as part of the SAWS annual budget approved by the SAWS Board of Trustees. The 2023 funded CIP is approximately \$525M. The 2024 to 2028 unfunded CIPs are approximately \$552M/year. The actual 2024 to 2028 CIPs are contingent upon future SAWS Board approval of the annual budgets, of which funding may require rate increases that are contingent upon approval by the San Antonio City Council.

The portion of the CIP related to increasing the system capacity (Growth CIP) is defined by SAWS Water and Wastewater Master Plans. The Master Plans are developed to ensure adequate capacity for a 25-year planning period. The Master Plans are adjusted as needed by SAWS staff based on current development trends. In addition, the Master Plans are peer reviewed and updated by outside consultants approximately every five years. The current impact fee CIP relates to the Growth CIP between 2019 and 2028.

The San Antonio City Council approved the San Antonio Water System's Land Use Assumptions Plan (LUAP), Capital Improvements Plan, and Maximum Impact Fees on May 16, 2019. The revised fees went into effect on June 1, 2019.

The following table shows a summary of SAWS impact fees collected and spent for impact fee eligible projects from June 2019 through May 2023.

JUN 2019 – MAY 2023	IF Collected	d IF Spent
Flow	\$ 79,723,43	34 \$ 1,804,804
System Development	\$ 61,936,91	13 \$ 32,627,585
Collection	\$ 106,321,03	30 \$ 47,282,365
Treatment	\$ 47,433,25	57 \$ 1,966,924
Water Supply	\$ 197,601,06	62 \$ 61,111,871
Water Delivery (Recoup)	\$	- \$ 73,720,020
Wastewater (Recoup)	\$	- \$ 55,915,945
Water Supply (Recoup)	\$	- \$ 122,736,363
Total	\$ 493,015,69	96 \$ 397,165,877

The approved impact fees are meant to reimburse SAWS for costs associated with existing excess capacity and help fund infrastructure required to create new capacity. Since 1993 and continuing through May 2023, SAWS has collected \$1.27B in impact fees.

SAWS has directly funded impact fee eligible projects, which add capacity to the water and sewer system at time of construction with the expenditure of \$496.68M of the collected impact fees between 1993 and May 2023. Beginning in 2015, in accordance with state law, SAWS has elected to "recoup" impact fees associated with the reimbursement for existing excess capacity and use those impact fees to fund capital projects not directly associated with providing additional capacity. These recouped impact fees thereby serve as a tool to minimize rate increases. Through May 2023, SAWS has recouped \$461.95M in collected impact fees for this purpose. In total, SAWS has utilized \$958.63M of the collected impact fees as of May 2023.

SAWS is projected to spend another \$13.75M on impact fee eligible jobs currently in process and, over the next 6 to 12 months, SAWS intends to recoup an additional \$13.95M in impact fees to help fund other capital projects included in the current CIP.

Growth continues in our region and as a result, SAWS continues to move projects forward to meet the new demands. The attached Table C includes all projects included in the 2019-2028 impact fee update along with information regarding updates to revised cost estimates, status of projects and SAWS Board approved funding.

Please feel free to contact SAWS staff at any time for information on CIP projects.

### Table B: 2019-2028 CIP List of Projects and Board Approved Funding

This guide is provided to help the reader understand and navigate through the contents of the CIP list of projects. The listing is broken into the different sections for the different impact fee categories:

- Water Delivery Flow
- Water Delivery System Development
- Wastewater Collection
- Wastewater Treatment
- Water Supply

The information related to the different projects within each category is arranged in the following columns (from L-R):

• 2019 CIP Project ID: Identification numbers corresponding the projects listed in the CIP section of the 2019

Impact Fee Report

2019 CIP Project Name: Names matching the 2019 Impact Fee Report

Impact Fee Study Cost (2018): Project costs corresponding with 2019 report. Cost estimates from 2018

Current Cost: Updated value account for actual design and construction costs combined

Change in Project Cost : Difference between Impact Fee Study Cost and Current Cost

Difference has changed less than \$200,000 since last report
Difference has changed more than \$200,000 since last report

% Change in Project Cost: Difference between Impact Fee Study Cost and Current Cost in Percentage

% Impact Fee Eligible: Taken from 2019 report: % eligible applied to impact fee study cost

Impact Fee Study \$ Impact Fee Taken from 2019 report: reflects the growth cost component that is included in the

Eligible impact fee calculation

Current \$ Impact Fee Eligible : % eligible applied to current cost

Change in \$ IF Eligible: Difference between IF study and current eligible costs

Projected Project Start : Anticipated project start date (typically design start) when project is initially planned

Current Project Start: Actual design start date

Milestone: Shows if the project is under land acquisition, design, construction or closed

Board Approved Amount Total approved funding for the project: includes Acquisition, Design, Construction,

(July 2022) Project Closing and other capital expenditures. As of July 2022

Board Approved Amount Total approved funding for the project: includes Acquisition, Design, Construction,

(May 2023) Project Closing and other capital expenditures. As of May 2023

Change in Board Approved : Reflects change between July 2022 and May 2023

Amount

Comments: Provided to explain outlying values or unique circumstances

#### Special notes

- Items in bold above relate to new or amended columns in the table
- <u>Current cost</u> will match initial cost if the project is still in planning and no significant activity has occurred
- Due to the integrated nature of our water distribution system, the <u>% eligible</u> and corresponding dollar value will be blank for the System Development section. In the 2019 report, the percent eligibility was determined for different types of facilities such as wells, elevated tanks, ground tanks, and pumps. Percent eligibility was also differentiated by impact fee area: High, Middle and Low. These complexities make it difficult to apply % eligibility to individual projects
- <u>Current Project Start:</u> This date is the actual design start of the project. In some cases this information is not available particularly for developer projects. When not available, current start is the same as the Initial start date
- Milestone: this field is blank for projects that are still in planning.
- Comments: New comments are added in the May 2023 report
